Profinance MSK

Moscow

Product Designer

I work with FIBO Group, an international brokerage. Responsible for developing client-facing and internal digital products in trading.

Products & scope: Fibo Forex for iOS/Android, the client dashboard, the corporate website, analytics services, the economic calendar, EAJ Trader, and new product directions.

Responsibilities

- Designing user scenarios, CJMs, user flows, and information architecture for mobile and web products.
- Conducting UX audits, competitive analysis, in-depth interviews, and testing product hypotheses.
- Growing the design system: components, states, responsive rules, and consistency across Web, iOS, and Android.
- Preparing interactive prototypes, final mockups, and specs; design reviews and development support.
- Presenting solutions to product managers, developers, and business stakeholders; contributing to the product roadmap.

Results

- Built a unified design system for the client dashboard, website, and mobile app, standardizing components across platforms and reducing new-feature design time

by 15%.

- Shaped the Fibo Forex product roadmap following a full UX/UI audit, initiating work on the financial calendar, partner program, IB accounts, cashback, and gamification.
- Designed EAJ Trader from the ground up, turning a business concept into user scenarios, a client-dashboard structure, and a design system now ready for development handoff.

Foreesco Group

Product Designer · part-time

A product studio building custom B2C apps for iOS and Android. Ran several mobile products in parallel, owning the full design cycle.

Responsibilities

- Conducting CustDev, UX research, and competitive analysis.
- Shaping product hypotheses, product structure, and key user scenarios.
- Creating mobile concepts, interactive prototypes, and final UI.

Results

- Designed the 360 Tracker mobile app MVP, leading research and defining the product structure and key user scenarios.
- Designed the Namaste fitness app, including a personalized workout and user-scenario system.
- Prepared the MVP to test user demand and validate key product hypotheses.

Alif Bank

alif.tj/ru · Financial sector · Bank

UX/UI Designer

One of Central Asia's largest digital banks. Worked on B2B, B2C, and internal banking products together with business, analytics, product, and development teams.

Responsibilities

- Researching user experience, UX audits, in-depth interviews, and building CJMs.
- Designing mobile and web interfaces, complex internal systems, and B2B scenarios.
- Creating prototypes and design concepts; presenting and defending solutions to the team and clients.
- Preparing mockups for development, running design reviews, and controlling implementation quality.

Results

- Designed the Alif Partners B2B platform for a network of 2,000+ bank partners, digitizing installment-plan processes. This reduced the load on moderators and

the call center, sped up request processing, and improved Task Completion Rate, installment Conversion Rate, and Time to Approval.

- Moved board meetings, voting, and approvals off paper, Excel, and email onto a single platform, Alif Audit, reducing fragmentation in the internal process and improving Time to Decision, Process Efficiency, and User Adoption.
- Automated part of the communication with debtors through Autocall and integration with banking systems, reducing manual work for collections staff and improving Operational Efficiency, Cost per Case, and Agent Productivity.
- Designed and launched the Visa Privileges section in the Alif Mobi mobile app.

ADDITIONAL INFORMATION

Portfolio: madinarashidova.is-a.dev

Product designer with 4+ years of experience in fintech, banking, and trading. I design complex B2B, B2C, and internal services for Web, iOS, and Android, covering the full cycle from research and product hypotheses through final UI, design systems, specs, and implementation quality control. I translate business requirements and technical constraints into clear user scenarios, back decisions with data, and work well with cross-functional teams.
